

# Lower energy costs for owners of income-qualified one-to-four unit properties

## Are you a one-to-four unit property owner with income-qualified tenants?

### You may be eligible for a free energy review!

To qualify at least half of the occupants must be income-eligible renters. In addition to a FREE energy review, this program pays at least 50% of the cost for qualifying installed weatherization and high-efficiency equipment upgrades including:

- Insulating attics and walls
- Tuning-up, repairing or replacing natural gas furnace/boiler and replacing the water heater
- Sealing air leaks

Plus, each tenant will receive a FREE DIY energy efficiency kit upon the completion of the building's energy review.

Participating property owners may attract and retain long-term, satisfied tenants by making property improvements that save money and energy.
